Plant Spacing Chart: How Much Space Between Each Plant In ... Use this vegetable plant spacing guide to help you plan how best to place vegetables in your garden. To use this chart, simply find the vegetable you plan on putting into your garden and follow the suggested spacing for between the plants and between the rows. If you plan on using a rectangular bed layout rather than a traditional row layout, use the upper end of each between the plant spacing for your chosen vegetable.

How Much to Plant per Person in the Vegetable Garden How much of each vegetable to plant also depends on the size and layout of your garden. You generally get more yield in a small space if you garden in wide rows. In "How To Grow More Vegetables", intensive gardening guru, John Jeavons, says you need about 200 sq.ft. per person to grow enough vegetables and soft fruits for the growing season at intermediate yields.
